CLEAN AIR, RENEWABLE ENERGY | THE POWER OF WATER

Founded in 1998, the Canadian Hydropower Association (CHA) is the national trade association dedicated to representing the interests of the hydropower industry. Its members span the breadth of the industry and, with more than 50 members, include hydropower producers, manufacturers, developers, engineering firms, organizations and individuals interested in the field of hydropower. CHA members represent more than 95% of the hydropower capacity in Canada.

The Association is governed through an elected representative Board of Directors.

Mission

We, the Canadian hydropower industry, promote the technical, economic, social, and environmental advantages of hydropower. We advocate the responsible development and use of hydropower to meet our present and future electricity needs in a sustainable manner.

Vision

Hydropower leads the way for reliable, renewable, clean energy.

Advantages

By joining the CHA, you become member of a young and dynamic association that advocates the interests of the Canadian hydropower industry and promotes hydropower as a clean and renewable energy source. You will be invited to the annual meeting and the Forum on Hydropower; you will receive regular updates of the Association's activities and quarterly newsletter; and you will have access to the research, the information, and the various documents produced by the CHA.

Thanks to your support, the voice of Hydropower is growing stronger
